

SODIUM SULPHATE (ANHYDROUS)

Description

Anhydrous Sodium Sulphate is white free flowing powder and easily soluble in water.

STANDARD NO : TS 1866 CLASS1
EEC NO : 231-820-9
CAS NO : 7757-82-6

Chemical Properties

Sodium Sulphate, (as Na ₂ SO ₄) (%)	99,6 min.
Sodium Chloride, (as NaCl) (%)	0,05 max.
Chromium, as Cr (mg/kg)	1 max.
Iron, as Fe (mg/kg)	5 max.
Insoluble in water (%)	0,1 max.
Moisture, (%)	0,2 max.
pH (%1 solution)	6,0- 8,0

Physical Properties

Appearance	White powder
Bulk Density, (kg/m ³)	1300 - 1500
Particle size (+0,074 mm) , %	90 min.

Packaging

Big Bag	1000 kg
PP+PE bags+palette	25/1000 kg

Control

According to TS 1866

Uses

Detergents, textiles, photography, dyestuffs, paper-making, glass, water treatment, porcelain etc.
